## **GENERAL INFORMATION:**

The course was held on 12<sup>nd</sup>- 13<sup>rd</sup> of November, 2019 in the auditorium of Jordan Univeristy of Science and Technology, Faculty of Medicine, King Abdullah University Hospital, Amman- JORDAN. Our theoretical lessons and practical sessions were done on time regarding our course programme. On every theoretical lesson, one of the faculty member has performed a poll to ensure that all of the participants participating the theoretical lesson. On hands-on trainings, we had made four stations with one ultrasound device, one live manikin and one faculty member each giving hands-on training to 9 or 10 participants. By this way, we have given detailed hands-on training and time to participants for practising the ultrasound scan by themselves. Faculty member performed ultrasound scan first, and then all of the participants performed the ultrasound scan on live mannikin one-by-one. The participants were guided and supervised by the faculty member during their hans-on practising also. The participants were divided to four groups and every group has worked on different station for each practice session, so every participant had the chance to work with different faculty members. Every participant had a checklist for every practical session. The faculty member evaluated the participant's ability to perform POCUS with these checklists. The checklists have proven the participant's attendance, also. We have collected these checklists and checked at the second day of the course, before the post-test. After we have proven that all of the participans have done the practical trainings in a suitable manner by the checklists, we have performed the post-test. After the post-test, we have requested to fill the feedback forms for the event as the standard forms of EACCME. In this course, we have added a section to evaluation forms to evaluate every lecturer's performance in theoretical lessons and hands-on trainings. After that, we have made our closing ceremony. We are preserving all the feedback forms, pretest and posttest answer sheets, and practical session checklists to declare if it is requested by EACCME.

Most of the participants were from Jordan, but we had 3 participants from Iraq, 7 participants from Palestine and 2 participants from USA. The last mentioned two participants are originally from USA, they have studied in USA and they are working in the Embassy of USA in Jordan. The majority of them were Emergency Medicine Specialists, but there were Intensivists participating the course also.

We wish to thank you for your collaboration and efforts for this course.

Best Regards.

Arif Karagöz, M.D.

Head of Sonoschool Accreditation Committee

Member of Emergency Physician Association of Turkey (EPAT) and member of working group for Emergency Imaging of EPAT.
